## AgroSource Welcomes New Team Member

(Tequesta FL)

AgroSource is pleased to announce that Julia Stover has joined the AgroSource team as Consulting Field Representative effective July 10, 2017. Based near Sacramento, California, Julia's territory will include the major pome fruit (apple and pear) growing regions across the United States. Julia's strong technical background includes a B.S. degree from the University of Florida in Plant Pathology, a M.S. degree from the University of California (Davis) in Plant Pathology and a second M.S. degree from the University of Arkansas in Horticulture specializing in fire blight control.

"I'm excited for the opportunity to work with pome fruit growers and people in our industry. Bringing personal and dedicated service as well as practical solutions to our customers is my goal", says Julia. Taw Richardson, AgroSource President, expressed his enthusiasm with having Julia as part of the AgroSource team: "Julia brings a personal and dynamic presence built on technical competence in her field. We are fortunate to have such a qualified and energetic person as part of our organization."

About AgroSource

AgroSource is a global agricultural life science company established to meet unique needs of growers, with emphasis on specialty crops. The AgroSource team works in a focused and collaborative manner with the agricultural community to identify products that meet these needs - ones that are often overlooked by highly diversified companies. AgroSource developed, manufactures and markets **FireWall™** and **FireLine™** bactericides.
