

Recommended Adjuvants

For Florida

IS04-062118

Why Use Adjuvants?

- The bacteria that causes HLB resides inside the citrus tree
- Certain adjuvants have the ability to move these bactericides systemically throughout the tree
- Product efficacy is not dependent on timing applications to flush periods
- Independent research has shown specific adjuvants are needed for effectiveness of FireLine™ and FireWall™ to increase yield

Which Adjuvants to use?

Product	FireLine™	FireWall™
COHERE®	✓	✓
EXIT®	✓✓	✓✓
GROUND®	✓✓✓	✓✓
JOINT VENTURE®	✓✓✓	✓✓✓
KeyPlex® 445 DP®	✓✓	✓
TACTIC™	✓	✓✓
LI 700®	✓✓✓	
CoRoN®		✓
NUTRISYNC® MICRO PAK		✓✓✓
N-Sure®		✓✓✓
PHASE®		✓

Based on extensive testing, AgroSource recommends using these adjuvants

Of adjuvants tested only these facilitated systemic movement of FireLine™ and FireWall™ for treatment of HLB

Other adjuvants may or may not perform comparably
